VOLCANIC STONE KIT

INSTALLATION INSTRUCTIONS FOR VOLCANIC STONE KITS FOR USE WITH GAS FIREPLACES

GENERAL INFORMATION

The decorative volcanic stone contained in this kit may be used with Innovative Hearth Products' gas fireplaces. It is used to enhance the appearance of the firebox floor. This kit contains one bag of decorative volcanic stone and these instructions.

INSTALLATION INSTRUCTIONS

Step 1. Turn off the fireplace and allow it to cool before proceeding.

Step 2. Slightly lift and pull the existing top radiant panel or louver assembly away from the fireplace.

Step 3. Open the bottom radiant panel or louver assembly by pushing in simultaneously the left and right sides of the louver assembly. (The assembly is hinged at the bottom.)

Step 4. Open the two glass door latches located underneath the firebox.

Step 5. Remove the door from the fireplace by swinging the bottom of the door outward and lifting it up and away.

Step 6. Spread the decorative volcanic stone over the firebox floor in a nonuniform manner while ensuring coverage of the firebox floor.

Note- Do not place any decorative volcanic stone on top of the gas burner where it may block the burner ports.

This bag contains enough decorative volcanic stone for a large 45 inch wide fireplace. Use proportionally less stone for smaller fireplaces.

Step 7. Position the glass door in front of the firebox opening with the bottom of the door held away from the fireplace. Hook the top flange of the door frame over the top of the firebox frame. Let the bottom of the door frame swing gently in towards the fireplace ensuring that the gasket seats evenly as the door frame draws shut. Fasten the two latches located underneath the firebox floor to the door's vee-flange. ***Close both the latches securely.***

Step 8. Reinstall the top radiant panel/hood assembly or hood and louver assembly. Make certain that the hood is installed as shown in ***figure 1*** (clean face models) or ***figure 2*** (louvered models). **The fireplace must not be operated without the hood installed as shown in these figures.**

Step 9. If applicable, close the bottom radiant panel or louver assembly.
