Cat. No.	Model	Description
H4651	DPSS36	36" Stainless Steel Drain Pan
H4652	DPSS42	42" Stainless Steel Drain Pan

REQUIRED TOOLS AND SUPPLIES

PVC Pipe and Caulking

GENERAL INFORMATION

To prevent water collection inside the fireplace bottom, install an optional drain pan accessory.

READ ALL THE STEPS BEFORE STARTING THE INSTALLATION THE FIREPLACE MUST BE OFF AND COLD BEFORE BEGINNING.

ALL WARNINGS, PRECAUTIONS AND INSTRUCTIONS IN THE INSTALLATION AND OPERATION MANUAL PROVIDED WITH THE APPLIANCE APPLY TO THESE INSTRUCTIONS.

If you encounter any problems, need clarification of these instructions or are not qualified to properly install this kit, contact you local distributor or dealer.

If any of these parts are missing or damaged, contact your dealer or IHP.us.com for referral information.

INSTALLATION INSTRUCTIONS

When Planning for the installation of the fireplace, the framing height must be increased from 46-1/2" to 47-1/4", when installing the drain pan. An additional space below the fireplace will also be required to plumb a drain line.

Step 1. Seal all joints, gaps and corners around the bottom of the drain pan before positioning the fireplace on its location *(**Figure 1**)*.

Step 2. On the exposed drain hole, install a PVC threaded coupling reducer, 3/4" x 1/2" going from the top of the pan, down through the hole. Apply a silicone-based sealant around the base and threads before installation.

Step 3. Holding the reducer coupling with a wrench, thread a 3/4", 90 degree, PVC elbow to the reducer until it is tight to the metal.

NOTE: *To assure proper drainage, the fireplace must be installed on a leveled surface.*

Step 4. Add additional piping to route the drain to an appropriate location.
