CHANGE NOTIFICATION

[FOR USE WITH BARCELONA LIGHTS® AND VRE4600 SERIES OUTDOOR GAS FIREPLACES]

CHANGE NOTIFICATION

There has been a change in the length of the LED retainer clips from 2" long to 2- 5/8" inches on the Outdoor Fireplace, P/N's F3491 - F3498. This change lowers the LED light rails in the fireplace to approximately 1/4" from the bottom to provide a better "flame picture" during windy conditions. This is a running change and does not affect operation of the fireplace.

TOOLS / SUPPLIES NEEDED

Phillips Screwdriver

Step 1: Remove the lower windshield clip secured to the existing LED retainer clip on each side of the fireplace. **Note:** Top windshield clip will remain in place.

Step 2: Remove old LED retainer clips on each side.

Step 3: Install new LED retainer clip with existing screws, starting with the bottom hole first.

Step 4: Install existing windshield clip, with existing screw, in the top of the new LED retainer clip.

Note: Some fireplaces may have three holes behind the LED retainer clip. Use the mating holes that align with the new LED retainer clip. In addition, if you have a see through fireplace the clips should be changed on both sides to ensure the LED light rails remain the same height.

GENERAL INFORMATION

All of these parts may scratch and bend, great care should be used in handling them.

If you encounter any problems, need clarification of these instructions or are not qualified to properly install this kit, contact you local distributor or dealer.

Read this instruction sheet in its entirety before beginning the installation.

ALL WARNINGS AND PRECAUTIONS IN THE INSTALLATION AND OPERATION MANUAL PROVIDED WITH THE APPLIANCE APPLY TO THESE INSTRUCTIONS.

TURN OFF THE APPLIANCE AND ALLOW IT TO COMPLETELY COOL BEFORE PROCEEDING.

Check the contents of the kits upon receipt and check for any damaged or missing parts. If there is hidden damage, notify your freight company or IHP dealer immediately.
